

Botox at Life Care

Life Care would like to help you on your journey to perfecting your skin and obtain a youthful, smooth and radiant look. Though there are risks and complications, as with any cosmetic service, the results are astounding. With a few well-placed injections, you can get rid of imperfections!

Botulinum Toxin, a neurotoxin produced by the bacterium Clostridium A, can relax the muscles on areas of the face which causes wrinkles associated with facial expressions. Treatment with Botox® can cause our facial expression lines or wrinkles to essentially disappear. Areas most frequently treated are: glabellar area of frown lines, located between the eyes; crow's feet (lateral areas of the eyes); and forehead wrinkles. Botox® is diluted to a very controlled solution and when injected into the muscles with a very thin needle, it is virtually painless. Clients may feel a slight burning sensation while the solution is being injected. The procedure takes about 15 – 60 minutes and the results last about 1 – 6 months. With repeated treatments, the results tend to last longer.

Current Pricing is \$11 Per Unit. (May be subject to change at the discretion of the facility).
